## INTRO

---

I'm a software engineer with 5+ years of experience building clean, scalable systems that solve real-world problems. I care about architecture, impact, and doing things right. **Mastery takes knowledge and work — and I show up with both.**

## TECH STACK

---

Languages & Frameworks	PHP, TypeScript, Laravel, NestJS
Databases & Search	MySQL, Redis, ElasticSearch
Cloud & Infrastructure	AWS, GCP, Linux, Docker
Distributed Systems	Temporal.io, REST, GRPC, Protobuf, RabbitMQ
Tools & Practices	Git, CI/CD, Hexagonal Architecture, DDD
Languages Spoken	English (B2), Polish (native)

## CAREER HIGHLIGHTS

---

### Backend Team Leader

Telgani

Aug 2023 – Present  
Remote – Riyadh, Saudi Arabia

*Leading the backend team of the largest car rental platform in the Middle East, handling high-scale architecture and critical systems*

- **Took ownership** of complex domains after two years of deep involvement
- **Architected scalable solutions** that handle thousands of daily transactions
- **Introduced technical standards and practices** that reshaped how the team ships code
- Mentor for engineers, **driving quality and autonomy across the team**
- Built systems that are **resilient, observable, and ready for production pressure**

### Senior PHP Developer

Telgani

Jun 2021 – Jul 2023  
Remote – Riyadh, Saudi Arabia

*Key contributor to the core backend of a multi-component platform used across web and mobile.*

- **Stabilized critical flows** (rental, return, extension) used by thousands of users daily
- Spearheaded improvements in **monitoring, logging, and system visibility**
- Developed multiple features from scratch and **optimized legacy codebases**
- Recognized by both the team and leadership for **technical insight and initiative**
- **Set new team habits** around testing, reviews, and deployment

### PHP Developer

PROEXE

Feb 2021 – May 2021  
Warsaw, Poland

*Software house experience that sharpened my backend focus and cloud knowledge.*

- **Worked with top-tier engineers** on high-quality backend systems
- Gained hands-on experience with **cloud infrastructure (AWS, GCP)**
- Shifted fully into logic and systems architecture — **no distractions, just backend**
- Delivered production features for real users under tight deadlines
- This is where **I turned skill into discipline**

### Junior Fullstack Developer

MoveCloser

Feb 2020 – Dec 2020  
Warsaw, Poland

*The place where I first worked on real-world applications and found my direction as a developer.*

- Learned **Laravel and modern PHP** in a fast-paced team
- Built more than static sites — **delivered actual business applications**
- **Worked with developers way ahead of me**, absorbing best practices daily
- This role **ignited my ambition to go deeper** into backend engineering

## ACHIEVEMENTS

---

- **Student:** [Google Cloud Fundamentals – Coursera](#)
- **Student:** [AWS Cloud Technical Essentials – Coursera](#)
- **Student:** [Programming with Google Go – Coursera](#)
- **Student:** Temporal.io Training – TalentLMS
- **Author:** [Laravel od podstaw – programowanie aplikacji w PHP, StrefaKursów.pl](#)
- **Contributor:** [Laravel Framework \(open source\)](#)
